Serial No.: 10/622,209 **Examiner:** Tuan Thai

For: **METHOD AND SYSTEM FOR EFFICIENT FRAGMENT CACHING.**

1. This action is responsive to amendment filed April 07, 22006. Claims 1-21 and 23-29 are now allowed.

REASONS FOR ALLOWANCE

2. The following is an Examiner's Statement of Reasons for Allowance:

The prior art of record does not teach or suggest, alone or in combination, **all** the limitations of the independent claims of the current invention (claims 1 and 15). Particularly, the prior arts of record do not specifically disclose a method for serving data comprises maintaining at the at least one server, an incomplete version of an object; maintaining at least one fragment at the at least one server, and in response to a request for the object from a client, the server sending to the client the incomplete version of the object, at least one

identifier for a fragment comprising a portion of the object, and at least one position for the fragment within the object; the client receiving the incomplete version of the object, the at least one identifier, and the at least one position; the client requesting the at least one fragment from the at least one server using the at least one identifier; and the client constructing the object by including the at least one fragment in the incomplete version of the object in a location specified by the at least one position. In light of the foregoing, claims 1 and 15 of the present application are found to be patentable over the prior arts.

Claims 2-14, 16-21 and 26-29 further limit the allowable independent claims 1 and 15. These claims are therefore allowable for the same reason as set forth above.

Any comments considered necessary by Applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
